## **FOR IMMEDIATE RELEASE**

### **Integra Business Systems, Inc. To Automate Payday Advance Company With Electronic Signatures And Document Imaging**

Safety Harbor, Florida, June 8th, 2005 - Integra Business Systems, Inc. a leading vendor of document management solutions for the financial services industry has announced a deal to provide imaging and electronic signature capabilities at over 1,000 locations for Check Into Cash, a leader and 12 year veteran in the Payday Advance industry.

By implementing Integra's [iDentifi™ product line](#) at the corporate and store level, Check Into Cash will transform itself from an intensely paper-based business to one that uses electronic signatures and document imaging to process and archive its customer loan paperwork.

Integra's tightly integrated [iDentifi.WebDocz](#) and [iDentifi.eSign](#) products will capture loan agreements previously printed out as multiple paper copies at each location. With the new system Check Into Cash's customers will use familiar electronic signature pads to sign their agreements on-screen. Once executed a PDF version will be archived at the store level and also added to a centralized corporate repository for instant retrieval company-wide. Expected advantages include reduced costs for paper, toner and time saved by employees. The new system will also make it easier for Check Into Cash to satisfy regulatory compliance requirements.

"This deal adds payday advance services to our growing list of financial solutions", notes Adam Yahre, Vice President of Marketing for Integra Business Systems. "Our experience with banks and other financial institutions gives Integra a distinct advantage when rolling out mission-critical applications."
