FOR IMMEDIATE RELEASE

Integra Business Systems, Inc. Announces Integration With Monarch Software

Safety Harbor, Florida - December 19, 2005 - Integra Business Systems, Inc. a leading vendor of document management solutions for the financial services industry today announced integration with Monarch, the world's leading report mining software from Datawatch Corporation (NASDAQ: DWCH).

The new feature will be included with Integra's upcoming V3.5 release of its flagship document repository iDentifi.WebDocz. Other 3.5 features include an improved report (COLD) and image viewer, more search options and dozens of other enhancements to the browser interface. Existing customers will receive the update at no charge.

"Many of our customers already archive a significant number of reports as text or PDF and then import those files into Monarch to develop their data models" notes Aaron Stine, VP of Development for Integra. "Now it's just one click to go from viewing a report in WebDocz to transforming it into live data for analysis and export with Monarch."

About Integra Business Systems, Inc.

Integra is a leader in document imaging, management and workflow with over 15 years experience in the financial service and real estate industries. The iDentifi product line delivers a wide range of features for scanning, storing, coding, tracking, finding and viewing documents throughout the enterprise. Modular solutions include storage and management of all document types, workflow, enterprise report management (also known as COLD), electronic signature, signature and photo ID verification, and CD&DVD archiving.
